

Small Business Loan Origination, Auto-decisioning Enterprise Solution

RADAS™ SBS enables banks to:

- Input their own decision parameters
- Originate loans from the branches
- Enter their credit policies
- Perform quick financial analysis
- Decision quickly based on decision parameters
- Integrate with credit bureaus
- Monitor portfolio exceptions
- Establish underwriting standards
- Create user level loan approval threshold
- Bucketize loans in approval, decline and to-be-reviewed category
- Be regulatory compliant
- Provide quick loan approval
- Have time stamp and workflow management

RADAS™ SBS is a comprehensive small business decisioning enterprise suite that works toward improving the overall workflow compliance. It provides small business loan origination, easy consolidating of borrower and guarantor financials, adoptive built-in score cards, auto decisioning, and override decisions.

RADAS™ SBS complies with The Bank Secrecy Act, Audit Control Requirements, Transaction Level Verification, The Patriot Act, and The Community Reinvestment Act.

“We needed a company that would work with our needs; not just sell us the latest shelf product. RADAS™ provides integrated customer information, statement analysis, narrative, and management reporting capabilities all housed under one platform. We reviewed various solutions offered by several vendors, and found that RADAS™ solutions were a perfect match for us. We are very pleased with the on-going prompt professional user support that Lexrule Corporation provides.”

— Robb Strader

Chief Credit Officer, Virginia Community Bank
